**What are our customers saying?**

**Real Customer Survey Questions:**

Question: **What could we have done to better meet your expectations?**

Response: **Zack was great.**

Question: **What could we have done to better meet your expectations?**

Response: **nothing - very happy**

## Need Help with Wireless Issues?

As organizations rely more and more heavily on Wi-Fi networks, performance bottlenecks and failures become increasingly significant. These risks impact a variety of industries including Retail, Healthcare, Warehousing / Manufacturing and Government. MTSi provides certified Wi-Fi professionals with industry leading tools to solve your wireless issues or build you a rock solid Wi-Fi network.

## Services Spotlight

### Has Antivirus become Obsolete? Is EDR the answer?

When deciding between the Antivirus and Advanced Endpoint Protection tools, it is important to consider the different features each offer. You can see the improvements of EDR over AV in the table below.

[Learn More about EDR](#)

Managed Endpoint Detection and Response	Anti-Virus Solutions
Gain freedom from ransomware by rolling back devices to their pre-infection state.	Can't roll back to a pre-infection state, increasing your ransomware risks.
Use artificial intelligence (AI) to detect and prevent both current and emerging threats, with continual updates to the platform.	Use signatures to identify threats, meaning capabilities lag cyber-attackers' latest strategies.
Monitor processes before, during, and after execution, to prevent new threats from slipping in.	Fly blind during execution, creating an entry point for new threats from savvy attackers.
Monitor your systems in real-time.	Rely on daily or weekly scans, increasing your risks.
Keeps device performance fast with continual monitoring.	Can slow down your device performance with long scans.

## 2022 Cybersecurity Trends:

### How to build a culture of cybersecurity

#### Make cybersecurity part of the organization's fabric

Companies are under pressure to step up cybersecurity given the scope and scale of what's at stake. Cybersecurity Ventures projects global cybercrime costs to grow by 15% per year over the next five years, reaching \$10.5 trillion annually by 2025.

In 2021, the average data breach cost soared to \$4.24 million, the highest in the 17-year history of IBM's Cost of a Data Breach report. The common theme in these and other cybersecurity reports is that the human element is by far the largest risk. In fact, the 2021 Verizon Data Breach Investigations Report found the human factor was involved in over 85% of breaches, whether that entailed falling for a phishing attack, making bad decisions that lead to malware infections, or using easily decipherable passwords.
