"There are three ways to ultimate success: The first way is to be kind. The second way is to be kind. The third way is to be kind." —Mister Rogers

What are our customers saying?

**Question:** Additional Comments

**Response:** I find Noah to be helpful, pleasant, and very knowledgeable of his job. I am thankful for his assistance!

**Question:** What could we have done to better meet your expectations?

**Response:** Dan is great. he is knowledgeable and a big help!

## When was your last Vulnerability Assessment?

Many companies are being asked this question by Insurance Providers.

### Services Spotlight

Discover your exposure to outside attack before a hacker does.

Threat actors today can literally cripple an organization with Ransomware or exploit sensitive customer data, causing significant financial harm to your customers and catastrophic harm to your reputation. Our Vulnerability Assessment is a point-in-time service, which identifies potential sources of network breaches, provides recommendations on how to close them, and professional services as needed to secure your network.

Cyber insurance has been around for about 20 years. These insurance policies cover common cyber-related losses, such as those associated with data breaches and ransomware attacks that result in loss of business or disruptions.

But while more companies may be looking for insurance against attacks, stability in premium rates and access to policies are changing. Large-scale attacks—such as last year’s Colonial Pipeline ransomware attack, which led to short-lived gasoline shortages in the Southeastern U.S.—have highlighted the potential for catastrophic financial damages. As a result, insurers are starting to take steps to limit their exposure to these losses.
