"The greatest glory in living lies not in never falling, but in rising every time we fall." -Nelson Mandela

What are our customers saying?

Survey Score: 5.00 out of 5.00

**Question:** Was the technician professional in all ways?  
Response: 5

**Question:** How would you rate the timeliness of the resolution of your issue?  
Response: 5

**Question:** How would you rate the support representative's ability?  
Response: 5

## Microsoft retires Basic Authentication in Exchange Online

As more sophisticated cyber criminals take aim at hybrid and remote workers, Microsoft is working to raise awareness among Exchange Online customers that one of the most important security steps they can take is to move away from outdated, less secure protocols, like [Basic Authentication](#). As previously [announced](#), we are turning off Basic Authentication in Exchange Online for all tenants starting October 1, 2022.

## Services Spotlight

### **The Latest In EDR From VMWare Free, Self-paced Test Drive and Presentation**

Carbon Black Cloud is a new Endpoint Detection and Response (EDR) tool from VMWare that consolidates multiple tools into one console. Carbon Black allows you to implement Zero Trust with fewer tools and deliver security with confidence and speed. Carbon Black gives you the flexibility to configure security policy granularly, so you can protect your organization from advanced threats without impacting legitimate business tasks.

For a limited time, MTSI is offering a Free, self-paced test drive of Carbon Black Cloud. The test drive will show you how easy it is to use Carbon Black Cloud to protect your organization and detect and remediate threats.

If you prefer an instructor led session, MTSi will be hosting a virtual presentation and demonstration on October 11<sup>th</sup> at 1:00 pm.

Contact [sales@mtsolutions.net](mailto:sales@mtsolutions.net) for access to the test drive or to reserve your seat for the presentation.

### **2022 Cybersecurity Trends: The White House released important cybersecurity guidance.**

[Official Link](#)

A White House office is publishing guidelines this morning for how federal agencies and government contractors will comply with President Biden's demand last year that federal systems and vendors meet common cybersecurity standards.

The memo — which The Cybersecurity 202 is first reporting — is perhaps the most-awaited cybersecurity guidance from the Office of Management and Budget (OMB) since Chief Information Security Officer Chris DeRusha joined the Biden administration at the beginning of 2021, he told me.

It stands to affect the security of government systems and therefore the ability of feds to provide services, as well as the process for billions of dollars worth of federal contracts. That, in turn, could pressure any company that might want to do business with the federal government to meet the government standards, as a senior administration official told reporters last year before rolling out Biden's executive order that spawned today's memo.
