Anti-Virus Service Ending July 1, 2023

Since 2013, Endpoint Detection and Response (EDR) has been gaining popularity as a means of protecting against viruses and other cyberattacks. MTSi has been transitioning customers from anti-virus to EDR over the last few years and in July 2023, will no longer be providing anti-virus service.

Why discontinue anti-virus?

Anti-virus relies on signatures to identify files that carry known viruses. Anti-virus offers little to no protection against new threats or threats that are not transmitted in a file. In the modern threat landscape, anti-virus products offer users a false sense of security, leaving them vulnerable to attack.

Why is EDR better? [Learn More](#)

2023 Cyber-Security Trends:

NIST CYBERSECURITY FRAMEWORK GETS 'SIGNIFICANT UPDATE'

The National Institute of Standards and Technology (NIST) is making sweeping updates to its Cybersecurity Framework (CSF) to better integrate areas like supply chain risk management and governance.

First published in 2014, the

framework is a set of standards designed to help organizations assess, understand, manage and mitigate the security risks that they face. While voluntary for the private sector, the framework serves as a backbone for many government policies around the world, and the 2017 Strengthening the Cybersecurity of Federal Networks and Critical Infrastructure executive order made it mandatory for U.S. federal agencies. Certain insurance firms have made the framework mandatory for specific sectors as well, and organizations can also require the use of the framework within their supply chain.

What are our customers saying?

Survey Score: 5.00 out of 5.00

Question: Additional Comments

Response: It's always a pleasure to work with Zach. This was a challenging situation, and I appreciated his explaining the troubleshooting steps to me.

Question: Was the technician professional in all ways?

Response: 5

Question: How satisfied were you with the overall service you received?

Response: 5
