Services Spotlight

Security Awareness Training

It's estimated that 3.4 billion phishing emails are sent each day worldwide and that 91% of all successful data breaches begin with a spear phishing attack. Information Technology professionals agree that end users are the weak link in cyber security defenses. Security awareness training helps shore up your defenses by teaching users how to spot phishing attacks and by providing tools to help users request help dealing with suspicious emails.

Would your team spot the difference between:

www.vmware.com/support

and

www.vmware.com/support

Wouldn't it be great to know who on your team was likely to click the malicious link above?
